Summary

Computer Science student with hands-on experience through Java and Software Development internships, applying programming skills to real-world projects. Proficient in Java, SQL, HTML, CSS, JDBC and debugging with a strong understanding of database management and application development. A quick learner with excellent problem-solving and collaboration skills, seeking an entry-level Software Developer role to contribute to impactful solutions in a dynamic and innovative environment.

Experience

Java Intern

Alo Info-Tech, Parvathipuram

- Assisted in developing and maintaining Java-based applications using Core Java, JDBC, and SQL for database connectivity and CRUD operations.
- Collaborated with senior developers to design and implement MVC architecture for scalable projects.
- Gained hands-on experience in debugging, troubleshooting, and optimizing code logic, ensuring smooth execution of applications.
- Worked with Eclipse and VS Code IDEs, managing templates, adjusting configurations, and resolving project setup issues

Software Development Intern

Kodnest Technologies

Bengaluru, Karnataka, India

28 Feb 2026 - Present

- Intern at KodNest, where I acquired practical skills in Java, MySQL, Frontend Technology, Manual Testing, contributing to real-world projects and learning directly from industry professional

Education

Bachelor of Engineering in Computer Science

2022 – 2026

University College of Engineering, Nagercoil [Anna University]

CGPA: 8.3

Higher Secondary Certificate (12th)

2021 – 2022

Mother Theresa Matriculation Higher Secondary School, Mylancode

89%

Secondary School Certificate (10th)

2019 – 2020

Mother Theresa Matriculation Higher Secondary School, Mylancode

88%

Skills

- Java
- HTML
- CSS
- SQL
- Git
- GitHub
- VS Code

Certifications and Licenses

- Python Programming – Comprehensive Training – Infosys SpringBoard

- Comprehensive training in Python programming, covering essential concepts and practical applications
- CareerEdge – Young Professional – TCS iON
 - Professional development course aimed at young professionals, covering various aspects for starting a career
- The Complete Python Developer – Udemy
 - Course from Udemy focused on developing skills as a complete Python developer
- Java Training – Besant Technologies
 - Training in Java programming, covering core concepts and application development

Mini Project

Greeting App

Technologies: Java, Spring Boot, HTML, CSS

Developed a web-based Greeting App using Java, Spring Boot, HTML, and CSS. Designed a responsive and user-friendly interface using HTML and CSS. Integrated the frontend with the Spring Boot backend to display dynamic greeting responses. Implemented a clean and interactive application with a simple and maintainable architecture.

Brain Tumor Detection:

Technologies: Python, OpenCV, TensorFlow/Keras, CNN, NumPy

Developed a CNN-based model to detect brain tumors from MRI images. Performed image preprocessing using OpenCV to improve classification accuracy. Classified MRI scans as tumor or non-tumor using deep learning techniques. Applied AI and Computer Vision concepts for healthcare diagnostics.

Projects

Organ Donation Management System

Technologies: Java, Spring Boot, SQL, HTML, CSS

- Developed a web-based Organ Donation Management System to manage donor registration, recipient registration, and organ request processing.
- Built the backend using Java and Spring Boot to handle user authentication, donor and recipient management, and organ allocation workflows.
- Designed and implemented a responsive and user-friendly interface using HTML and CSS.
- Used SQL to securely store and manage donor, recipient, hospital, and organ donation records.
- Streamlined the organ donation process by automating registration, record management, and matching requests, improving overall efficiency and data organization.
